IT Solutions for New Businesses

Working on your new Business is an exciting and interesting journey. But it can cause a lot of stress and anxiety if you are not familiar with the information technology aspects that are required to do it well. At DWS, we are specialized to assist with new office IT set-up solutions for businesses in UAE. We provide consultation, and essential services to set up an office that meets all your Information Technology needs.

Whether you need help with IT set-up for your new office in UAE or need help modifying your existing office IT, we can easily customize solutions to meet your business needs, flexible to work with your timelines and aligned with your business priorities.

IT Infrastructure Consultancy

We provide consultancy services for all your IT infrastructure-related requirements, do a survey of the physical site, and draw a plan and proposal for your new office IT setup. First, understand your business priorities and derive the best possible solution that gives you the best Return on Investment.

Internet, Phone and Business Collaboration

Our team works closely with Du and Etisalat to offer your business the best and most suitable communication packages. Our plans also consider any near future expansions that you might expect and go ahead based on that. DWS infrastructure provides IP-PBX solutions for effective and quality output for all your needs.

Business Wi-Fi Solutions

Wi-Fi problems often cause disruptions and decrease the overall productivity of your business teams. Our Business Wi-Fi solutions make sure that you have excellent connectivity across your office space. Along with Wi-Fi solutions, DWS infrastructure solutions enable a seamless flow of communication between you, your employees, your customers, and your partners.

Cyber Security Solutions

Security solutions are critical in ensuring the continued growth of your business. Our team is well-equipped to customize a security plan that meets all your needs and create a safe, productive safe for your employees. Our services extend beyond the installation and make sure any future security solutions that you might need.

Backup Solutions

Our team is aware of how critical it is to take measures to protect your data from all future threats and prevent any data losses. With our data backup strategy, we make sure that your data is backed up and stored in places where it won't be lost due any sudden infiltration or damage of your infrastructure. Our solutions make sure full recovery in case of any such emergency

Structured Cabling Solutions

- It is important to set up the proper data cabling and infrastructure in your new office. It is key to ensuring a smoothly running IT system for all elements of your organization, i.e., servers, desktop, wi-fi routers, network switches and routers, printers, telephone systems, and FAX machines. Our team helps you with the planning and design as well as the installation of the cabling of your office.
- Consumer satisfaction is our top priority, so all our material is genuine and Etisalat/Du approved.

New Office Network setup and relocation services

Our team arrives on-site with your workers on Day One to make sure that all questions are and resolve networking issues immediately. Once everything is in place, our team inspects that the access points for all the cabling are at the right places. It also ensures that the phone lines are well-connected and all the internet and telecom solutions are working smoothly (such as call-forwarding, FAX, etc.) Any issues with Wi-Fi connectivity and speed get resolved before making a complete handover to your communication operators.

Business IT Equipment Solutions

DWS is a leading reseller of all Business IT equipment, including desktops, laptops, printers, and copier solutions in the UAE. Our products are genuine and provided at affordable prices. All the equipment will first be matched with your requirements before installation.
